Impacts of COVID-19 on Local Sports Organizations

Nationwide Survey Results

Presented by:
Francesca Jackman & Richard Way

Developed in consultation with Catriona Le May Doan
1,300 organizations responded, representing almost 4 million members.
99% are affected by COVID
65% clubs can’t access CEF funding
21% may not recover without emergency support
EXECUTIVE SUMMARY

This report outlines the findings of the nationwide Impacts of COVID-19 on Local Sports Organizations survey that Sport for Life conducted between May 19 and June 5, 2020, based on Sport Calgary's recent survey. The data collected from 1,300 respondents representing nearly 4 million members and more than 56 sports, informs governments of the operational and financial impacts the pandemic has had on sports organizations.

These organizations, which represent about 4% of the sport sector across Canada, collectively employ roughly 14,500 employees so their viability could affect more than 350,000 jobs significantly impacting Canada’s unemployment rate.

99% of sport organizations are affected by COVID-19 while 65% of clubs and associations cannot access Canadian emergency funding initiatives. As many as 21% may not recover without emergency support, resulting in less opportunities for sport. We know that this will especially impact lower socio-economic families.

79% of organizations are servicing our youth. Over 50% will be impacted into 2021.

The organizations have a decreased revenue from registration fees, sale of goods, fundraising, sponsorships, as well as numerous other impacts. Most organizations are trying to adjust their fixed and variable operating costs to survive. Summer camps may not run this year as a result of COVID-19, impacting parents’ ability to return to work.

30% of the organizations need only a small amount of emergency funding – less than $20,000 – to help them with COVID-19 inflicted challenges. However, others need more support – 31% need $20,000 to $100,000, while 11% need more than $100,000 to maintain operations.

In these turbulent times, sport can build communities, break down barriers and develop resilient people. Sport organizations are working hard to provide much needed opportunities for children to thrive and for adults to stay healthy. However, due to COVID-19, they need help.

Sport for Life would like to sincerely thank Sport Calgary for allowing us to use and disseminate this survey to local sports organizations nationwide.

Richard Way
Chief Executive Officer, Sport for Life Society
TABLE OF CONTENTS

Executive Summary – Page 4
Survey Demographics – Pages 6-10
  • Provincial and territorial jurisdiction – Page 6
  • Organization Profile – Page 7
  • Sport Distribution of Survey Responses – Pages 8-9
  • People and Communities Served – Page 10
Operational and Financial Impacts of COVID-19 on Sports Organizations – Pages 11-36
  • Organizational Operations – Pages 11-12
  • Financial impacts of COVID-19 – Pages 13-15
  • Emergency Funds and Other Needs to Maintain Operations – Pages 16-18
  • Organizational Sustainability in Current Conditions – Page 19
  • Typical Employee Demographics – Pages 20-24
  • Use of Federal and Provincial Initiatives – Page 25
  • Summer Initiatives – Pages 26-27
  • Building Support Networks – Pages 28-29
  • Organizations’ Responses to COVID-19 – Pages 30-32
  • Concerns of COVID-19’s Future Impact – Pages 33-34
  • Organizations’ messages to grant administrators, investors and sponsors – Pages 35-36
Additional Information – Pages 37-38
• All provinces and territories are represented in the 1,300 survey responses

• Alberta accounts for the greatest number of survey responses (370), in part due to the survey being independently conducted in 5 jurisdictions
Survey respondents indicated all (multiple) applicable ways to classify their organization.

- 2/3rds are non-profits.

(S4L data only)
• Curling, Multisport and Soccer represent the largest percentages of survey respondents, accounting collectively for **21%** of the 1,018 respondents of Sport for Life’s nationwide *Impacts of COVID-19 on Local Sports Organizations* survey

• Ice Hockey, Basketball, Baseball and Softball collectively accounted for **20%**

• Boxing, Karate, Gymnastics and Swimming accounted for **13%**

*Data from the 5 Alberta jurisdictions (Calgary, Edmonton, Medicine Hat, Grande Prairie and Lethbridge) did not indicate the sport respondents are involved in.*
PEOPLE AND COMMUNITIES SERVED

- Children (0-12 Years Old): 70%
- Youth (13-19 Years Old): 79%
- Adults: 65%

EMERGENCY FUNDING NEEDED TO MAINTAIN OPERATIONS

- Less than $20,000: 30%
- $20,000 to $49,999: 19%
- $50,000 to $99,999: 12%
- $100,000 to $249,999: 7%
- $250,000 to $500,000: 2%
- Over $500,000: 2%
- Unsure: 3%
- Not applicable: 23%
- Other: 2%
FIXED/VARIABLE COSTS AND EMERGENCY FUNDS NEEDED

- Figure 8 demonstrates, the majority of survey respondents operate with annual budgets under $100,000
- Figure 9 shows that 79% of survey respondents have not been fully able to reduce their fixed operating costs
- Figure 10 shows that 72.8% of survey respondents have not been fully able to reduce their variable operating costs
- As demonstrated in Figure 11, most survey respondents indicated their organization would require less than $20,000 in emergency funding to maintain operations and meet the demand for services, whereas 11% of survey respondents would require more than $100,000 to offset the impacts of COVID-19 on their organization’s operations costs
WHAT ORGANIZATIONS NEED BEYOND FUNDING

Clear communication/guidelines on Return to Play: 35%
Gov't to step in on Insurance risks: 5%
Gov't indication of long-term funding: 7%
Support from partners (PSO, NSO, etc.): 4%
Affordable access to space/facilities to run programs: 10%
Promotion to increase membership/engagement: 8%
PPE/Safety measures: 4%
Online/tech training/availability: 2%
Permission to open or to lift restrictions altogether: 6%
Nothing: 14%
Other: 5%

EMPLOYEES AND CURRENT EMERGENCY FUNDING INITIATIVES

• As Figure 14 demonstrates, the majority of survey respondents indicated having between 1 and 4 staff, either full time, part time, contract, others, or a combination

• On average, 36% of respondents reported having 0 staff (either full time, part time, contract and/or others) and 56% indicated “Not applicable” for one or multiple employee ranges

• 40% of survey respondents explained they’re predominantly or entirely volunteer-based and as such, do not qualify for the current provincial and federal emergency initiatives

• Figure 16 also suggests many local sports organizations are volunteer-based, with 53% of survey respondents indicating they have not laid off staff because they don’t have any paid employees

• 66% of organizations with employees have or will be laying off staff

• As shown in Figure 17, only 21% know they can hire staff back based on current federal or provincial COVID emergency funding

Most survey respondents indicated they’re working with others, whether it be within their sport or with other similar sports organizations to build long-term plans:

“We operate Return to Play webinars and continue to communicate through social media and other traditional modes. We have begun a Community of Practice web site FB and a public site for residents on Sport Physical Activity and Recreation to stay in touch with parents.”

“Our Speed Skating PTSO has reached out to the other ice sports in the NWT (hockey, broomball, figure skating and curling) to develop a collaborative message with respect to Safe Return to Play in the NWT.”

“Partnering with a local children's centre to help support and grow a Challenger Baseball program for Athletes with Disabilities. May look at additional ways to work with neighbouring baseball associations for joint initiatives.”

FIGURE 24
CONCERNS OF COVID-19’S FUTURE IMPACTS

• Many survey respondents expressed concern about membership retention, long-term operational impacts and the ability to recover, and their members who benefit most from the sport programs they offer:

“We are not able to offer hundreds of families the opportunity for their children to play organized sport and reaping all the benefits that brings.”

“I think we're all in the same boat, we all need to support each other. These are unprecedented times, and we all need to figure this out as we go.”

“I am very concerned that it will be virtually impossible to bring young children into the sport - especially a child who does not know how to skate. Potentially, we will lose an entire "birth year" of new players. Also very concerned about the older players who will not be satisfied with small groups and a focus on skill development.”
WHAT ORGANIZATIONS WANT TO SAY TO GRANT ADMINISTRATORS, INVESTORS AND SPONSORS

- Importance of amateur sport for the community (economic/societal benefit)
- Your help is greatly needed/appreciated
- Amateur sport is resilient and we are working hard to adapt/stay alive
- Revenue models/funding for amateur sport need to be reconsidered

FIGURE 25
ORGANIZATIONS WANT TO SAY TO GRANT ADMINISTRATORS,
INVESTORS AND SPONSORS...

“Sport is an integral part of the return to normal life following COVID-19 with a unique opportunity to help the community recover.”

“In these turbulent times, sport can build communities, break down barriers and develop resilient people.”

“Funding the sport will help to keeps fees down. We need to do whatever we can to keep kids in sport during these times, to keep up as much of their normal as possible.”

“‘If you get knocked down, get back up’ - We believe that now more than ever this message rings true.”
ADDITIONAL INFORMATION

• In addition to the 1,018 survey responses Sport for Life received on its nationwide Impacts of COVID-19 on Local Sports Organizations survey, 282 survey responses from the 5 Alberta jurisdictions who conducted independent versions of the survey (Edmonton, Calgary, Grande Prairie, Lethbridge and Medicine Hat) were also incorporated into the national data shared in this report.

• Based on the nature of the surveys conducted independently in Alberta, data for certain questions was not available to integrate with Sport for Life’s results. As such, the figures in this report are representative of all available data from all sources for each question.

• Due to the anonymous nature of Sport for Life’s survey, it’s possible there may be duplicate survey responses from the same organization. However, a cross-reference of the data from both Sport for Life’s survey and the surveys conducted throughout Alberta where organizations provided contact information (i.e. their email address) was performed to eliminate all traceable duplication.
